Cricket Tournament
2019-20

Introduction

Cricket is a sport that requires a bat and ball and consists of two opposing teams, each with 11 players. The field has an elliptical shape with a rectangular region in the center, referred to as the pitch, measuring 22 yards (20.12 meters) in length and 10 feet (3.04 meters) in width. At each end of the pitch, two sets of three sticks, known as wickets, are placed in the ground. The bails are horizontal pieces that lie across the top of each wicket. Both teams alternate between batting and bowling, with each turn referred to as a "innings" (always plural). Each side is allocated one or two innings, depending on the predetermined length of the match, with the aim of scoring the highest number of runs. The bowlers aim to strike the wicket with the ball, causing the bails to dislodge, by delivering the ball with a straight arm. This is one of multiple methods by which the batsman is eliminated or removed from play. A bowler executes six deliveries at a single wicket, thereby concluding a "over". Subsequently, another player from the same team bowls six deliveries at the opposing wicket. The batting team protects its wicket.

During a cricket match, there are always two batsmen on the field. The batsman who is currently facing the bowler, also known as the striker, attempts to hit the ball away from the wicket. There are two types of hits: defensive and offensive. A defensive hit can effectively safeguard the wicket, but it may not provide sufficient time for the batsmen to switch to the opposite wicket. Under those circumstances, the batsmen are not required to run, and the game will continue with another delivery. When the batsman successfully strikes the ball, he and the second batsman (known as the non-striker) swap positions at the opposite wicket. Each time both batsmen successfully reach the wicket on the opposite side, one run is scored. If the batsmen are not caught out or dismissed, they can continue to run back and forth between the wickets, earning an extra run each time they both reach the opposite side. There is a perimeter surrounding the cricket field. If a ball is hit to or beyond the boundary, it will score four points if it touches the ground and then reaches the boundary. However, if it reaches the boundary directly from the air (a fly ball), it will score six points. The team that scores the most runs emerges victorious in a match. If both teams are unable to finish their allotted number of innings within the given time, the match is considered a draw. Cricket frequently sees scores reaching the hundreds.

Objective: - This event aims to promote camaraderie, teamwork, and healthy competition among the different departments of AKS University, Satna. The tournament aimed to boost the confidence of the students and promote team building by providing them with an opportunity to participate in such competitions.

Event Details: - The tournament sought to enhance the students' self-assurance and foster camaraderie by affording them the chance to engage in such competitions. Additionally, its objective was to emphasize the athletic abilities.
